

EDITORIAL NOTE

Many countries brought ambitious climate promises to Glasgow. But that is not enough. There remains the gap between policy commitments to act and the world of solutions that our industry has in hand.

We have to take a step forward and make ourselves visible as **real-life practitioners of climate action** routed in a system change approach. We need to demonstrate what is possible and expedient in the climate transition to policy makers, financiers, clients and civil society.

Jan Van der Putten

20/10/2021 - **RIF**, the Association of Consulting Engineers in Norway published an **open letter**, addressing the challenges of the use of software in the construction industry, to design software developers and users, governmental entities and trade organisations
